Lumens	35LM
LED Span Life	50000 HRS
Solar Charging Time	8 HRS
Li-ion Battery Span Life	500 Circles
Solar Panel Span Life	More than 5 years

Different Applications

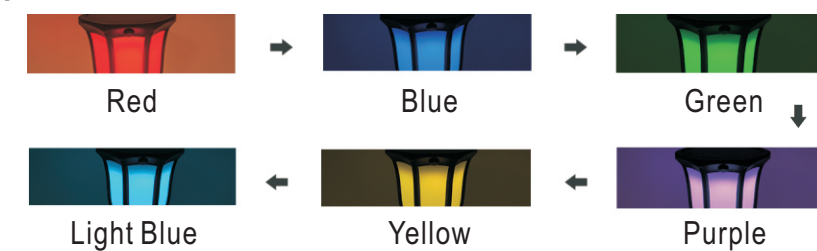

Brief Introduction

Solar lamp is a new product to use solar power for producing electricity. This light uses high-efficiency solar panels, which can transform solar energy to electric energy and stock it into built-in battery. Then it can provide energy to LED light. The unique optical controlled technology can ensure the light auto charging in daytime, and the light can automatically turn on at dusk. In addition, the light is easy to install, waterproof and anti-sunburn.

Operation Method

1. Press-and-hold the switch for 3 seconds to turn the lamp ON (Default Color is RED)
2. Short-press the switch once, the color will change accordingly and it is Single Color Always ON Mode. (6 colors in all- Red, Blue, Green, Purple, Yellow and Light Blue)
3. When the color is Light Blue, short-press the switch again, it will enter into 6-color Gradient Mode.
4. Under the 6-color Gradient Mode, just short-press the switch again, it will back to Single Color Always ON Mode.
5. Press-and-hold the switch for 3 seconds to turn the lamp OFF.
